[About](#) [Resume](#) [Portfolio](#) [Contact](#)

Assalam U Alaikum, I am Syed Hasnain Ali Shah and welcome to my first ever practice website.

## About

"Welcome to my creative space! I am a passionate cyber security expert dedicated to impactful security of networks. With a keen eye for detail and a love for cybersecurity, I aim to be one of the best cybersecurity expert. Throughout my journey, I've had the privilege of collaborating with best of the experts in this field and have honed my skills in networks security. My goal is to be the best in this field. Thank you for visiting, and I hope you enjoy exploring my creations as much as I enjoyed bringing them to life.

### Achievements

- I started **CCNA** course and cleared it on the first try.
- I have certificate from [Hack The box](#)
- I have created numerous websites for many leading business startups today.

## Resume

### Short Academic Journey

I've done my matric from a Icon Public School Barikot, Swat. Then I did my fsc from one of the most famous postgraduate colleges in Swat which is Government Postgraduate Jahanzeb college Saidu Sharif, Swat. I left my field, medical, for my interest, computer science, and in few years I see myself as a cybersecurity expert and a certified ethical hacker. In the first year of my Bs Computer Science I studied C++ and Java but my interest governed in cybersecurity due to one of my subjects, **Networking**, and then I started gaining some skills in the field of cyber security by starting from deep study of networks, linux and python.

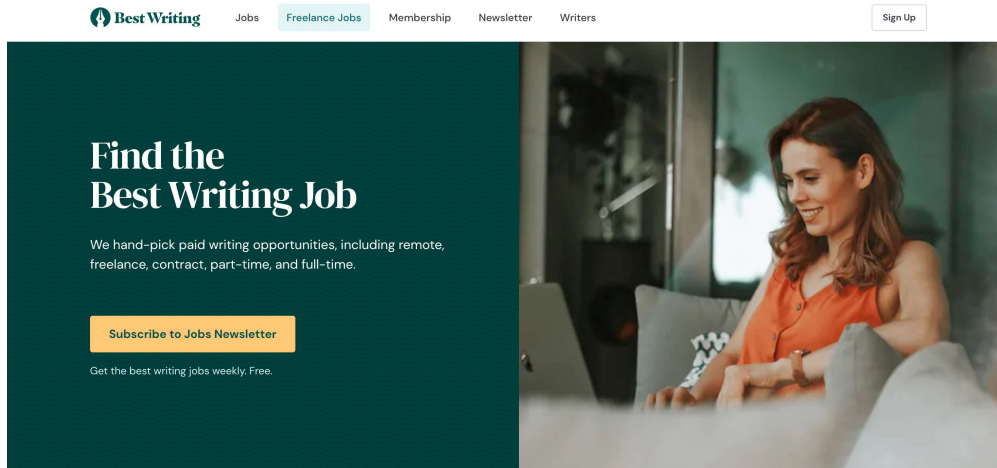

### Experience

I have worked in Microsoft as an intern for 3 months during summer break of university and I have also worked in other IT companies for a short span of time. But now I am focused on building a cybersecurity firm.

## Portfolio

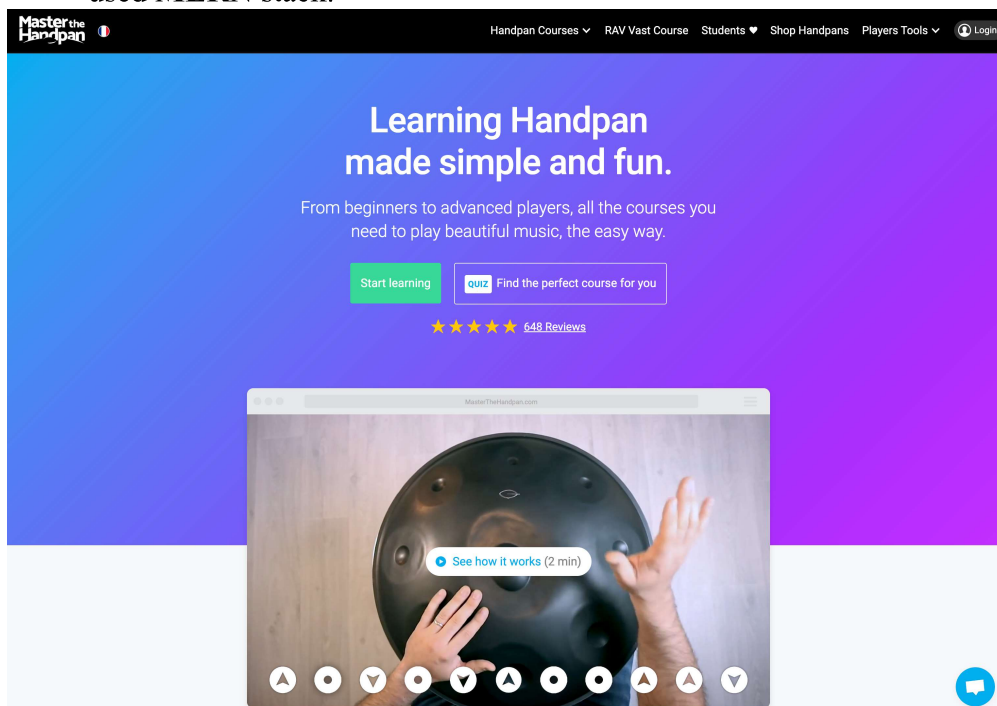

### Job Site

There is always a demand for quality job boards. If you have some technical skills already, starting a job web page of your own is a great idea for a side project that can help you bring in some extra income. For this purpose I have developed a website which suites for your side hustle. I have used Django framework to build this website.

### Online Learning Website

Quite a few platforms out there will host online courses for you. But they come at a price. I have developed a free website which offers course free of cost and are beginner friendly. In this websites I have used **MERN** stack.
